### HEALTH CERTIFICATES HAWAII AND OVERSEAS TRAVEL DESTINATIONS

These certificates are extremely complex, very time consuming, and thus are an expensive process. Clients who wish to travel abroad with their pets have to check with the USDA and their destination for all of their specific import/export requirements. Many destinations require specialized testing that takes time to complete.

**Step 1.** Obtain the requirements and review them to see what you need.

**Step 2.** Determine your planned departure date from the continental United States.

**Step 3.** Schedule consultation appointment, to confirm requirements and get an estimate of time to complete these requirements. The fee for this appointment is \$100.

***\*\*At this point examinations, tests, and treatments can be scheduled. All expenses for these items and shipping fees are additional to the initial consult. All further research into testing, requirements, and sample submissions will be charged on a per hour fee, \$20 minimum each time.***

***All fees are paid at the time they are incurred. A deposit needs to be applied to the account or a valid credit card number can be securely retained to prevent delays in this time sensitive process.***
